ABSTRACT OF THE DISCLOSURE

a SA The invention relates to <sup>a</sup>removable filter for buried catch  
basins. The filter includes a bag located below grade level in the  
5 catch basin and looped flaps which extend above grade level and aid  
in removal of the filter from the catch basin. The filter is held  
in place in the basin by a heavy grate which rests on the flaps.  
c <sup>The flaps</sup>  
10 ~~Flaps~~ extend at grade level away from the grate. The filter is  
removed from the catch basin for dumping by inserting a lift rod in  
each flap loop and hooking lift chains to the rods at openings in  
the loops. EA
